

Nawash Water Meters

This is a survey to help relay information and seek permission on Water Meters that the Water Treatment Team would like to install to help with identifying leaks within the Distribution Line and help the home owner Identify leaks within their household.

There will be no costs associated with the Installation or any Taxes/Fees with the installation of the Water Meters. There will be qualified Technicians Installing the Water Meters that will be accompanied by The Water Treatment Staff.

If you have any concerns, please fill out the questionnaire and/or contact the Capital Department. (Contact information at end of questionnaire)

Answer yes or no if you are opposed to having a Water Meter Installed

Comment:

Yes No

If opposed, what kind of information would you need to help with allowing the meters to be installed?

The Water meters will help with the overall operation of the New Water Treatment Plant to find and fix leaks effectively and efficiently.

The Water Meters will be installed during the construction of the Water Distribution line. And will ensure that there will be no costs to the home owner. If you have any concerns leave comments below:

Nawash Water Meters

Mission:

We are committed to providing you with the best water and Transparency, so you can have trust with the process of the Water Treatment and trust with drinking from the tap. One of the first steps to this mission is to install the Water Meters, this will allow The Water Treatment team to identify leaks so we can prevent cross contamination.

A lot of the original Water mains are farm grade, which cannot sustain the new pressures of the new Water Treatment Plant. The Water Meters will help with identifying if the leak will be in your household or the water main.

If you have any comments please leave below.

We are Constructing a New Water Treatment Plant that will create new and higher pressures.

Installing a Water Meter will help with understanding if your home can withstand the new Pressures and will determine where the water loss is within the system. We would like to have every household on the Community to have a Water Meter so we can help with fixing the water loss in our community, your home and start initiatives that will help provide services.
